

ovation[®]
it's the shape.

2011

Say hello To curvaceous tone.

In 1965, aerospace engineers at our parent company began an extensive research project to determine whether an **acoustic guitar** could be sonically improved by modifying its shape and construction. Using audio oscillators and spectrum analyzers, they measured the sonic characteristics of dozens of conventional guitars, and then began exploring new designs. Ultimately they discovered a bowl-shaped body dramatically enhances a guitar's projection, sustain, and frequency response. From this intensive R&D, the Ovation roundback guitar was born. When it debuted in 1966, our groundbreaking instrument drew immediate acclaim for its superior tone and volume. Guitarists love the powerful sound of our roundback guitars. We think you will too. The next step in acoustic guitar evolution.

Embrace total playing comfort.

Our bowl bodies are made from Lyrachord, a durable yet lightweight composite material designed to efficiently transmit vibration. A Lyrachord body has a smooth interior surface that reflects sound better than porous wood. A molded Lyrachord bowl doesn't require internal braces that can block soundwaves traveling inside the guitar. And unlike wood, Lyrachord is virtually indestructible—our bowls won't warp, chip, crack, or split. Thanks to Lyrachord, the Ovation roundback is the world's most scientifically advanced acoustic guitar. Embrace total playing comfort.

The next step in acoustic guitar evolution.

In addition to offering superior projection and durability, our roundback design has another advantage: A **bowl-shaped body** is comfortable to hold. The back and sides of a traditional flatback guitar form sharp, perpendicular edges that can dig into your ribs and make it difficult to find a relaxed playing position. By contrast, the gentle slope of our roundback body invites you to embrace the guitar. Whether sitting or standing, you can wrap yourself around the bowl and feel its vibrations. Simply put, a roundback Ovation connects you to the music. The world's original acoustic/electric is still its best.

The world's original acoustic/electric is still its best.

When our engineers **developed the Ovation roundback** in the mid '60s, they weren't content to design the world's most advanced acoustic guitar—they also wanted to amplify it. Applying their considerable R&D skills and resources to this task, they developed a musically balanced piezo pickup housed in an intonated bridge saddle, and a sophisticated **preamp** to control the pickup's output. This innovative pickup-and-preamp combination became the heart of the world's first professionally accepted **acoustic/electric guitar**. Today, we're still at the forefront of guitar design, building cutting-edge instruments from the ground up to deliver superior tone with or without amplification. If you want the ultimate acoustic/electric, play an Ovation.

Adamas I GT

Representing the ultimate craftsmanship from Ovation's flagship workshop in New Hartford, Connecticut, the Adamas 1687 GT features a unidirectional carbon-graphite suspended soundboard with Quintad bracing, which provides a bold, clear voice and lightning-fast response. Each top is precisely fitted with "AST" - Adamas Suspended Top - technology that allows the ultra-thin top to vibrate more freely than traditionally constructed acoustic guitars.

The non-cutaway Deep Bowl composite body is made by hand from fiberglass cloth and works in tandem with the top to enhance frequency response and improve projection. The Adamas GT's detailed ornamentation—including a carved peghead scroll, carved walnut bridge, and elaborately decorated soundholes—make a striking visual statement.

OP Pro Studio Preamp

The OP-Pro Studio combines state-of-the-art audio quality with exclusive features designed to meet the needs of professional guitarists. The easy-to-operate unit offers 3-band EQ, exciter and compressor/limiter circuitry, and a chromatic tuner. Ovation's exclusive Expressor and Drive sliders put dynamic control and harmonic enhancement at your fingertips, allowing you to dial in the precise amount of sustain and punch required by the music.

Adamas WT

New Wood Top Adamas

- Adamas "AST" (Adamas Suspended Top) technology – allows the top to vibrate more freely than conventional top-to-body systems – now available in wood top models
- Hand-made in the USA
- The top is made using AAA Grade solid spruce, finished with an ultra thin layer of satin urethane and hand fitted into the Suspended Top System
- Bodies are handmade fiberglass cloth – the thinnest and lightest material ever used on Ovation guitars
- Ovation's Contour body is the most ergonomically friendly body design on the market today
- Neck is made from Honduras Mahogany and Maple and is carved to a vintage Ovation "soft-V" profile for a comfortable feel anywhere along the fretboard
- The OP Pro Studio system features a compression function that accentuates single notes and works great for finger style players

Custom Legend AX

The Custom Legend

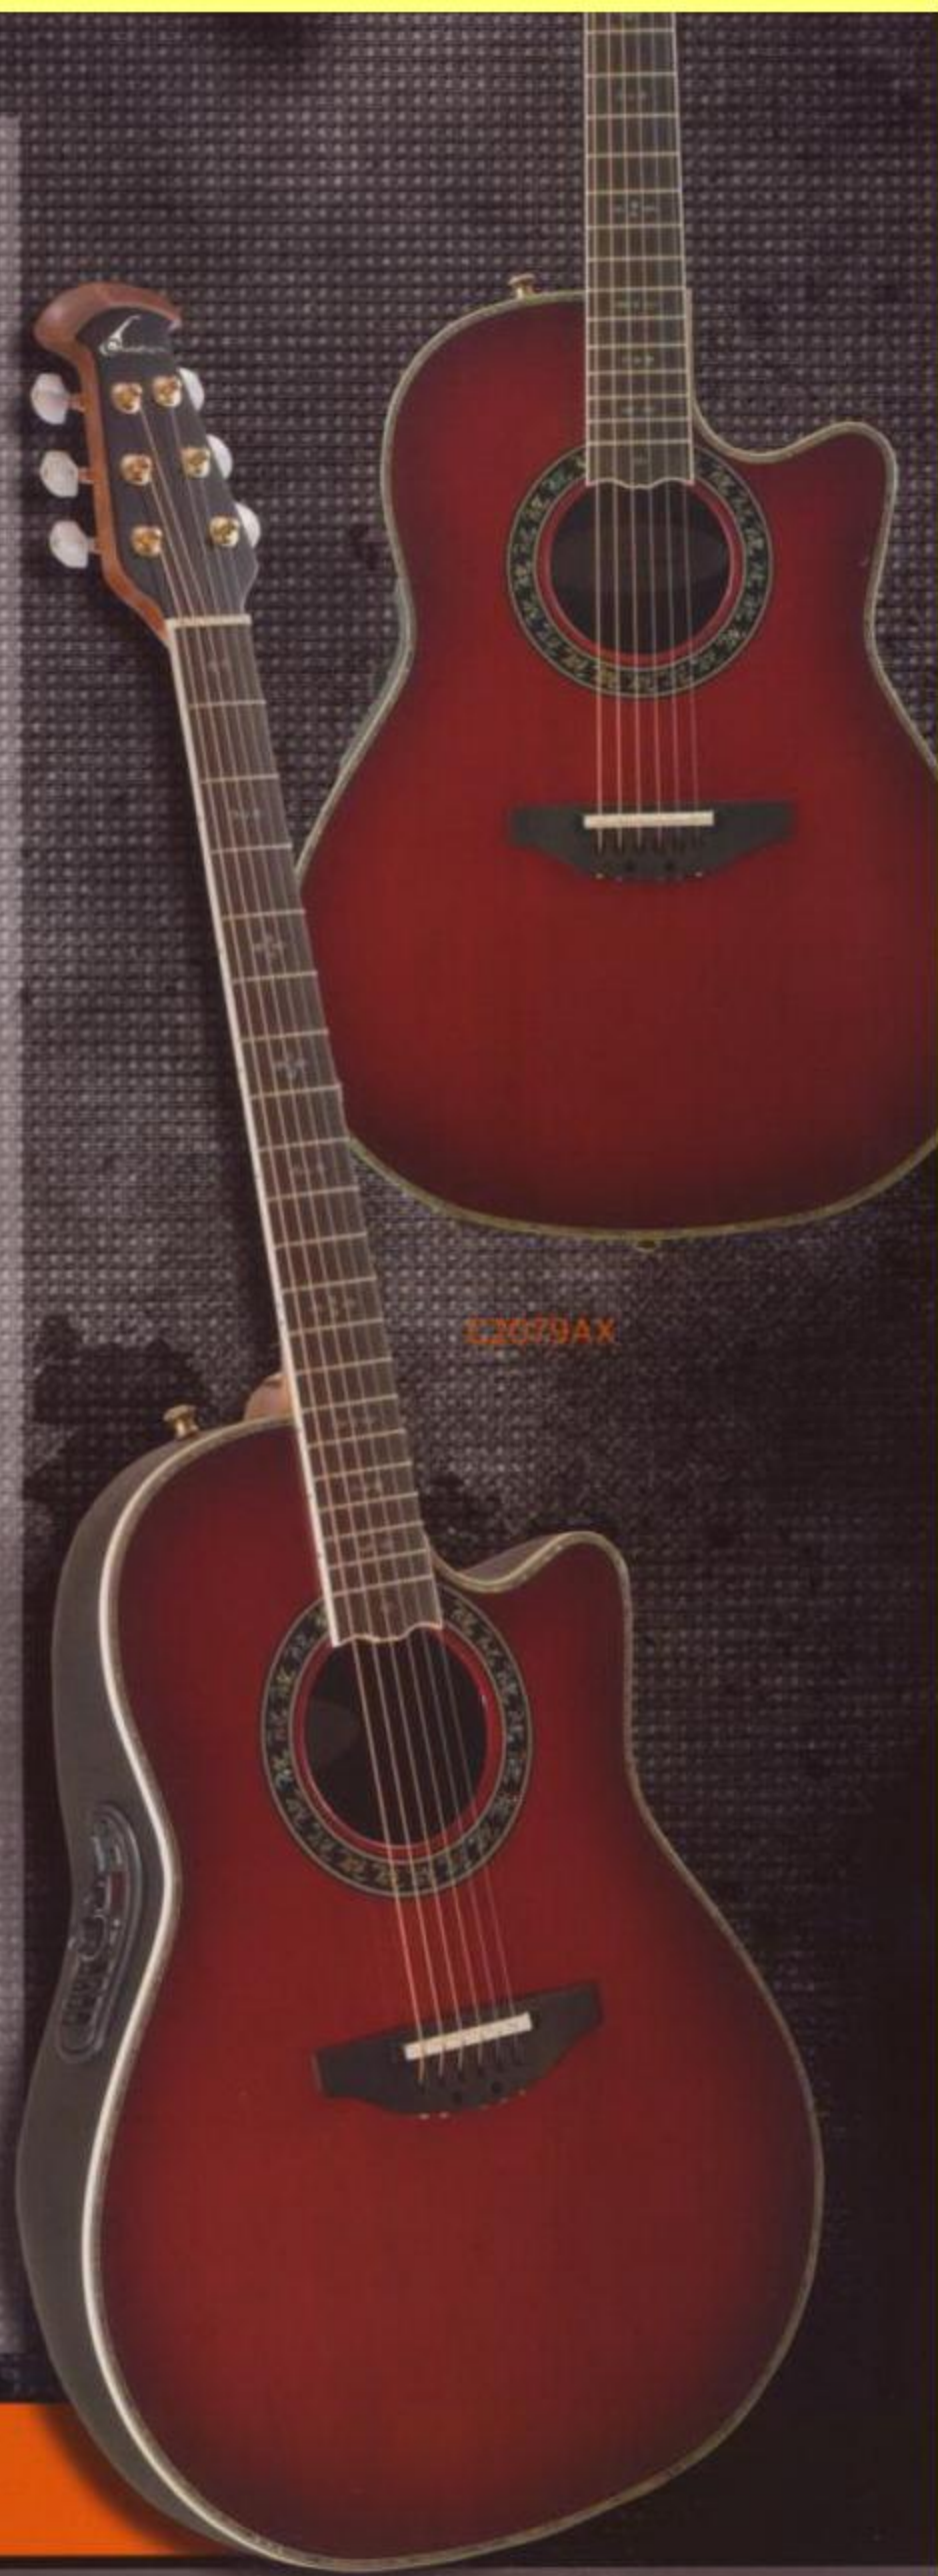

The new Custom Legend AX features a hand-selected, premium AAA grade solid-spruce top with LX scalloped bracing. This combination of premium soundboard materials and sonically tuned bracing produces more volume and less dead spots in the audio spectrum. Every note is clear and balanced - no matter where you play on the fingerboard.

The guitar's Contour composite body maximizes acoustic output and is ergonomically designed for comfort in any playing position. A cutaway offers full access to the gloss-finished, 5-piece mahogany/maple neck.

The Custom Legend AX also guitar boasts an deluxe grade ebony fretboard and bridge, and hand-set abalone body and fretboard inlays. The traditional center soundhole has a gorgeous laser-cut oak-leaf and abalone rosette.

With its onboard compressor, the OP-Pro Studio preamp enhances strummed chords, fingerpicked arpeggios, and single-note solos. Dual XLR and 1/4" output jacks connect the Custom Legend to virtually any sound system, stage amp, or recording console.

Elite TX D-Scale

6-String Mid-Depth Cutaway D-Scale

Designed to deliver fat, chunky tones in today's popular baritone and drop tunings

- Tuned a full step lower: D-G-C-F-A-D
- Capo the 2nd fret and you've got a standard tuned acoustic - Take off the capo and you've got a whole new instrument
- Opens up a world of possibilities for open tunings
- Scale length is 28 1/3" - extended scale length gives this guitar the voicing of a baritone with the playing ease of a standard 6-string
- Top is solid spruce finished in a lightweight textured black finish
- Scalloped bracing maximizes top vibration and sustain
- Neck is made from rock maple and finished in natural stain
- An OP Pro preamp is mated with the Ovation Original Patented Pickup, which provides even string-to-string output with any string gauge and any open tuning

Mandolin AX

The Ovation Pro Series Mandolin features a hand-selected solid-spruce top with lightweight, Mando-Quintad bracing designed to enhance punch and projection.

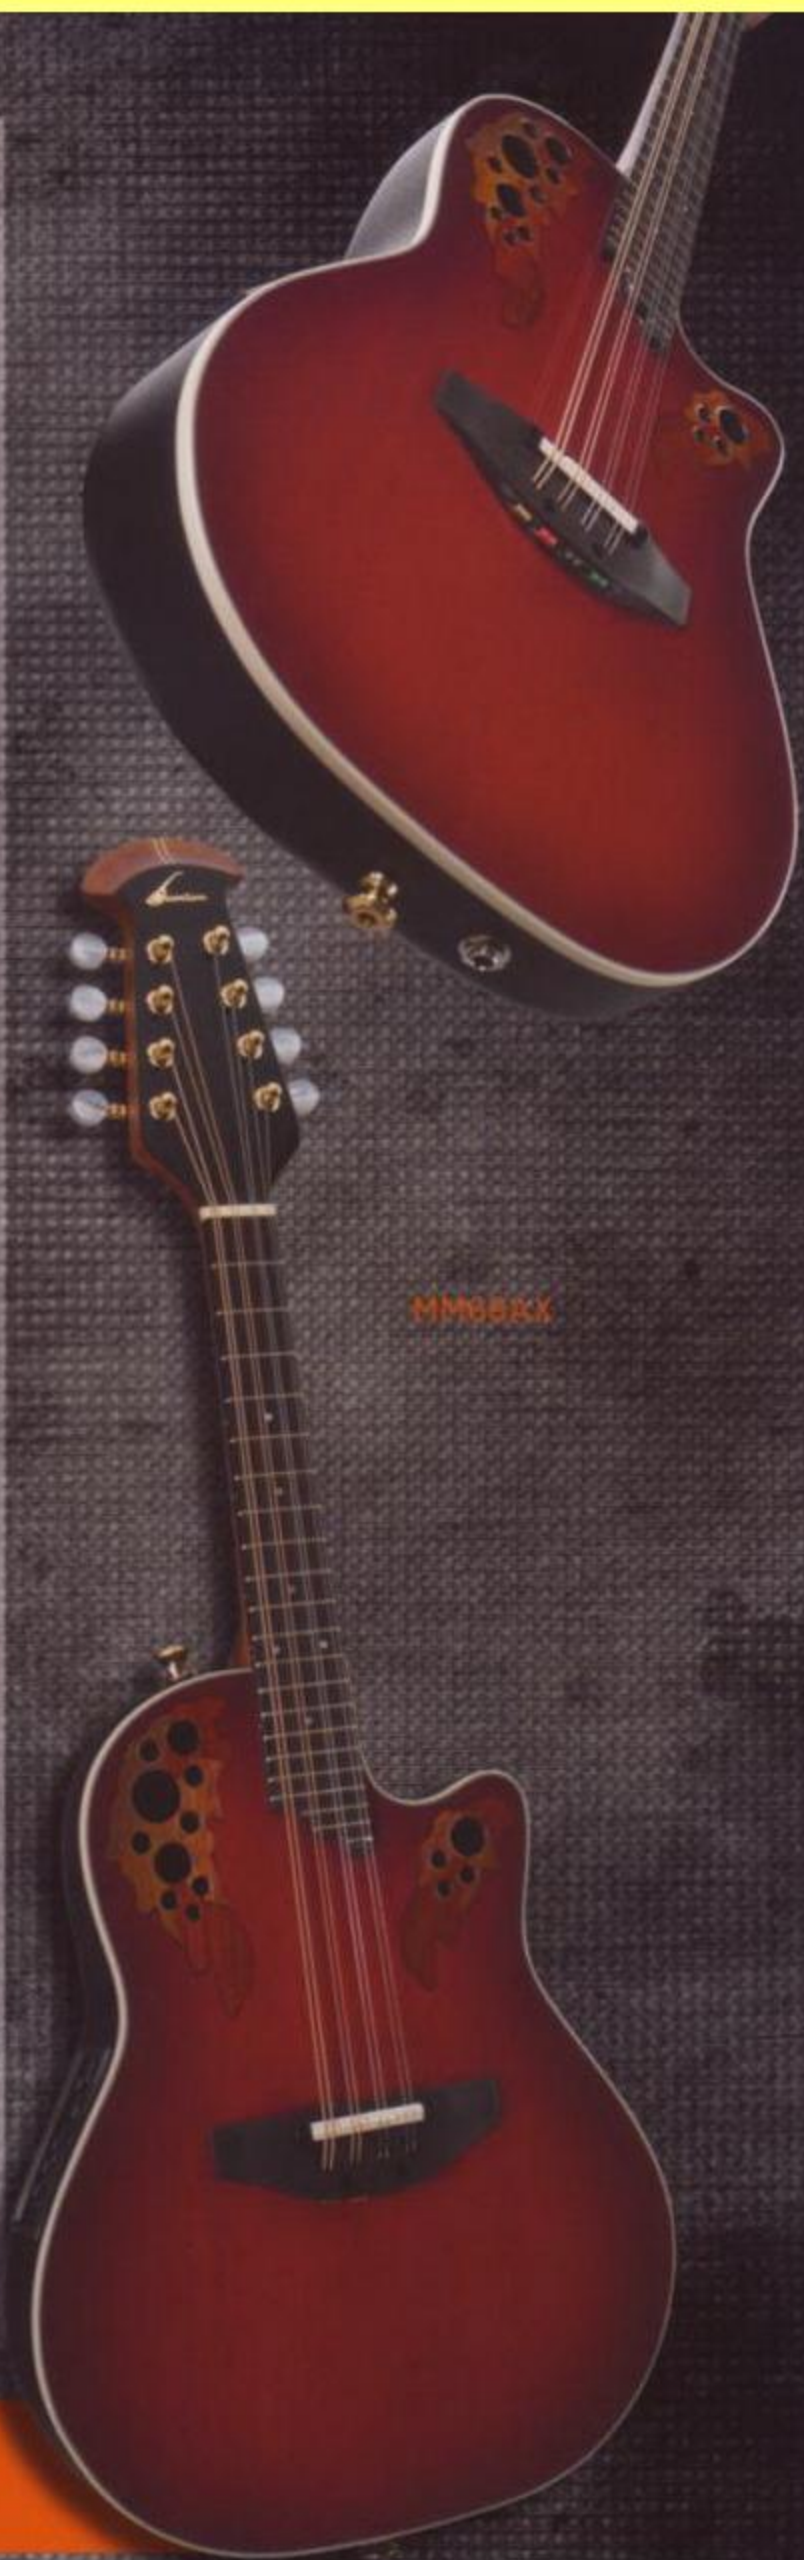

Ovation's pioneering multi-soundhole design enhances string vibration and sustain by improving soundboard efficiency. With its roundback composite body, the Ovation Mandolin offers more acoustic volume and cutting power than expensive flatback models.

The instrument's upper-bout soundholes are inlaid with exotic hardwoods, and a cutaway offers full access to the sleek, satin-finished 5-piece mahogany/maple neck and ebony fretboard. A custom high-output pickup and special version of the OP-24+ preamp give the Ovation Mandolin unparalleled amplified tone.

OP24+ Preamp

Offering whisper-quiet audio circuitry with very low distortion, the OP-24+ features 3-band EQ with a bypass switch, a Mid-Shift control for selecting a midrange center frequency of either 400 Hz or 1 kHz, a Pre-Shape circuit for boosting bass and treble response while cutting rumble-prone frequencies below 40 Hz, and a battery status light. To provide complete control over the high-output preamp signal, the OP-24+ has a custom-taper volume slider.

MODEL NAME:	Mandolin AX
